

Introducing the AMS

# GARDEN & FARM club

an new club where we actually grow things from seed!

Gardening is a science, an art and a therapy.

Experience how the plants we tend feed our bodies, our minds, and our senses. We will be a hands-on club so you can grow things at home even if you don't have a yard. Seeds will be provided! Mrs. Parham will teach you how to get your garden started, grow some veggies and how to make money selling flowers.
